Reviewer's report

Title: Hypermobility of the first metatarsal bone in patients with rheumatoid arthritis treated by Lapidus procedure

Version: 4 Date: 7 May 2012

Reviewer: Andreas Kranzl

Reviewer's report:

Discretionary Revisions:
The description of the measurement method could be described a bit better. Especially if you consider the paper from Schneider W. et al. 2002 (73), 670-673, Acta Orthop Scand. Intra- and interobserver repeatability of radiographic measurements in hallux surgery: improvement and validation of a method

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
