Reviewer's report

Title: Revision of Reversed Total Shoulder Arthroplasty. Indications and Outcome

Version: 3 Date: 13 August 2012

Reviewer: filippo castoldi

Reviewer's report:

The manuscript was well revised in all the parts that I’ve commented. It is easier to read and also clearer. The materials and methods are well organized so the reader can find the path of the study.

nothing to say again about the statistic.

In conclusion it is a manuscript well prepared

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
