Reviewer's report

Title: Prescription and dosing of urate-lowering therapy, rather than patient behaviours, are the key modifiable factors associated with achieving serum urate target in gout

Version: 1 Date: 31 August 2012

Reviewer: saima chohan

Reviewer's report:
This is an excellent review. The methods are easy to follow, appropriate and the conclusions are logical.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
