Reviewer's report

Title: Influence of Statins locally applied from orthopedic implants on osseous integration

Version: 1 Date: 5 June 2012

Reviewer: Gerald Zimmermann

Reviewer's report:

Dear Authors,

the paper is written well. It shows clearly the background, methods and results. The results were not expected and mostly conflicting with the rest of the literature. This is well discussed and critically embedded in the animal model and the type of coating of the implants.

The conclusion is correct, the figures and tables clear.

There are no revisions necessary

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
