Reviewer’s report

Title: Hip resurfacing in a district general hospital: 6-year clinical results using the ReCap hip resurfacing system

Version: 3 Date: 29 September 2012

Reviewer: Richie Gill

Reviewer’s report:

Major compulsory points
The number of subjects at risk at each year needs to be provided in the Kaplan Meier graph. The confidence interval should also be drawn on the graph. Also should be discussed that other series have shown good 5 year survival and then reported an increase in failures due to ARMD, e.g. Steffen et al JBJS Br, 2008 and Glyn-jones et al JBJS Br, 2009.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
