Reviewer's report

Title: Expression profiles of muscle disease-associated genes and their isoforms during differentiation of cultured human skeletal muscle cells

Version: 4 Date: 18 December 2012

Reviewer: Satoru Noguchi

Reviewer's report:

The Authors still mention that cells were cultured for 6, 16, 24 days after induction in Materials and Methods, but there are no data for 16 and 24 days. the authors should provide the data for these days, or they should omit the description of cultured for 16, 24 day in M&M.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
