Reviewer's report

Title: Pain relief is associated with decreasing postural sway in patients with non-specific low back pain

Version: 2 Date: 4 March 2012

Reviewer: Peter Vaes

Reviewer's report:

We remain disappointed that no information has been added related to the impact of low back complaints with or without ‘a history of low back pain’ and motor control deficiency, this remains a weakness of this study.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
