Reviewer's report

Title: Effect of Working Characteristics and Taught Ergonomics on The Prevalence of Musculoskeletal Disorders Amongst Dental Students

Version: 3 Date: 7 January 2013

Reviewer: Grant Townsend

Reviewer's report:

1. The authors have addressed the issue raised satisfactorily.
2. There are still many grammatical errors and problems with punctuation, use of tenses and formatting of the references that need to be addressed. The authors have noted that the manuscript has been reviewed by an English Language Lecturer but there is still a need for considerable improvement.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I declare that I have no competing interests.
