Reviewer’s report

Title: The course of radiographic loosening, pain and functional outcome around the first revision of a total hip arthroplasty

Version: 1 Date: 5 February 2013

Reviewer: Brett Levine

Reviewer’s report:

I had a difficult time reading through this paper. The grammar makes it very hard to read. Additionally, the short term follow-up and conclusions are difficult to understand what this paper adds to the literature.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests
