Reviewer's report

Title: The Effect of Moderate Physical Activity on Bone Mineral Density and Fracture Rate in Post-menopausal Women aged 75 and over: results from the Canadian Multicentre Osteoporosis Study.

Version: 2 Date: 22 January 2013

Reviewer: ray marks

Reviewer's report:

We know the benefits of exercise for preventing fracture.

How does this paper advance the field-for example the data presented in many related meta analyses and overiewed in:

Aerobic Exercise for Preventing Osteoporosis in Postmenopausal Women: an Update of its Effect on Bone Mineral Density

Source: Current Rheumatology Reviews, Volume 8, Number 2, May 2012 , pp. 141-159(19)

That is unclear.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
