Reviewer's report

Title: Adherence to Osteoporosis Regimens among Men and Analysis of Risk Factors of Poor Compliance: A 2-year Analytical Review

Version: 2 Date: 29 June 2013

Reviewer: Salvatore MINISOLA

Reviewer's report:

This is an interesting paper on the problem of adherence in male subjects with osteoporosis.

MAJOR COMPULSORY REVISIONS

Some papers important in this context should be cited; for example; Carnevale et al. Osteoporosis International 2006 (the problem of males is addressed in this investigation)

The discussion is excessively long and should be more targeted to the problem of men

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
