Reviewer’s report

Title: Re-growth of an incomplete discoid lateral meniscus after arthroscopic partial resection in a 11 year-old boy: a case report

Version: 1 Date: 25 June 2013

Reviewer: Marios Lykissas

Reviewer’s report:

This is very interesting and well written case of re-growth of an incomplete discoid lateral meniscus after arthroscopic partial resection restoring the pre-operative incomplete discoid shape. The authors suggest that the growth spurt may have an impact on meniscal regeneration. No corrections are needed.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
