Reviewer’s report

Title: Computer-aided individualized resection and endoprosthesis reconstruction of malignant bone tumors around the knee

Version: 2 Date: 20 June 2013

Reviewer: Bianca Bignotti

Reviewer’s report:

I have a general comment that has to be addressed.
In the present form the paper is very difficult to be read.
The Authors should rewrite it to give a more scientific appearance to the manuscript.
I'll revise it again if it will be written more scientifically.
I'm not able to decide if the manuscript is not written in a scientifically sound manner.
I don't understand if it is a case report, a case series, a technological innovation act....
The Authors should focus their writing on the message they want to convey.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
