Reviewer’s report

Title: High disease activity in ankylosing spondylitis is associated with increased serum Sclerostin level and decreased Wingless protein-3a signaling but is not linked with greater structural damage

Version: 2 Date: 7 February 2013

Reviewer: Xenofon Baraliakos

Reviewer's report:

Thank you, there are no further comments.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
