Reviewer's report

Title: Validation of quantitative magnetic resonance imaging-based apparent bone volume fraction in peri-articular tibial bone of cadaveric knees

Version: 2 Date: 26 February 2014

Reviewer: Alberto Tagliafico

Reviewer's report:

Minor Essential Revisions:

In the Methods, MRI sequences have to be described in more details.
The Authors should add some more comments in the Discussion about clinical usefulness of the results.

I have no more comments. The paper is interesting and well done.

Level of interest: An article of importance in its field

Declaration of competing interests:

I declare I have no conflict of interest.
