Reviewer’s report

Title: Open reduction and closed reduction internal fixation in treatment of femoral neck fractures: a meta-analysis

Version: 1  Date: 25 November 2013

Reviewer: Cemil Kayali

Reviewer’s report:

AVN rate of open reduction group: 43/478 = %8.9
" " closed reduction group: 71/505 = %14

The authors should explain; how could they say "In conclusion risk of AVN of femoral head was significant higher after open reduction compared with closed reduction".

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
