Reviewer’s report

**Title:** Prevalence and risk factors for periprosthetic fracture in older recipients of total hip replacement: A cohort study

**Version:** 1 **Date:** 11 February 2014

**Reviewer:** Anne Lubbeke

**Reviewer’s report:**

This is a well written manuscript, which adds useful information to the topic of periprosthetic fractures after total hip arthroplasty, while acknowledging all limitations of their data.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I have no competing interests in relation to this paper.
