Reviewer's report

Title: Lower hamstring extensibility in men compared to women is explained by differences in stretch tolerance

Version: 1 Date: 21 May 2014

Reviewer: Pedro A. A Lopez-Miñarro

Reviewer's report:

Discretionary Revisions

Please, do not use tittle words in the key words.
Page 3. First paragraph. More detail about the relationship between decreased hamstring extensibility and spinal and pelvic postures is necessary.
Page 7. Line 147. "Adjustable support was provided" A figure could be appropriate.
Statistical analyses. Normality test should be included.

Level of interest: An exceptional article

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
