Reviewer’s report

Title: Prediction of trapezius muscle activity and shoulder, head, neck, and torso postures during computer use: results of a field study.

Version: 3 Date: 3 August 2013

Reviewer: Pascal Madeleine

Reviewer’s report:

- Minor Revisions
The authors have addressed the raised comments adequately. I only have minor comments to be addressed prior to publication.
1) Response 5: The name of Dr Srinivasan is misspelled – please correct
2) The AA could with interest mention a recent study by Dr Samani addressing issues related to duration of exposure and risk of developing WMSD (Samani et al. BMC Medical Research Methodology 2013, 13:54).
3) Response 19: Add a reference to the statement “…where there are likely more sources of variability to affect physical exposures, as in the laboratory”. E.g. Madeleine Acta Physiologica 2010, 679:1-46

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests: I declare no competing interests in relation to this manuscript
