Reviewer's report

Title: Quantitative and temporal analysis of the reversibility of knee flexion contractures. An experimental study using the rat model.

Version: 1 Date: 1 September 2014

Reviewer: Perajit Eamsobhana

Reviewer's report:

Minor essentials revision
1. About title of the paper, the temporal analysis seem to be a difficult term for the reader, I suggest the word kinetic analysis is more easy for the reader to understand.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
