Version: 3 Date: 27 May 2003

Reviewer: Robert M Aris

Level of interest: A paper of limited interest

Advice on publication: Other (see below)

the manuscript has improved with the authors revisions. Can you clarify what the units of the BMD responses to bisphosphonates were? Were this % changes and if so why did the total body increase while the femur and spine decreased? were any of the changes significantly different from pre-treatment?
