Reviewer's report

Title: Advice or Exercise for Chronic Whiplash Disorders? Design of a randomized controlled trial.

Authors:

Mark J Stewart (Mark.Stewart@fhs.usyd.edu.au)
Dr Christopher G Maher (C.Maher@fhs.usyd.edu.au)
Kathryn M Refshauge (K.Refshauge@fhs.usyd.edu.au)
Robert D Herbert (R.Herbert@fhs.usyd.edu.au)
Nikolai Bogduk (mgillam@mail.newcastle.edu.au)
Michael Nicholas (miken@mail.med.usyd.edu.au)

Version: 3 Date: 10 Jul 2003

Reviewer: Robert Ferrari

Level of interest: A paper whose findings are important to those with closely related research interests

Advice on publication: Accept after discretionary revisions

The authors have done a good job addressing reviewer concerns. I understand the concerns of reviewer 2 with respect to the randomization design. The authors are testing advice only versus advice plus exercise. They could simply change the title of their study to reflect this (discretionary). However expressed, this study will provide useful information.
