Reviewer's report

Title: Magnetic resonance imaging of anterior cruciate ligament rupture

Version: 9 Date: 16 November 2004

Reviewer: Thomas L Pope

Reviewer's report:

General
Nicely written article with interesting association between ACL deficiency and Hoffa's fat pad alterations. Nice anatomic study of Hoffa's fat pad.
Adequate review of the literature. Excellent figures.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None that this reviewer can find

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
Minor grammatical changes by copy editor appropriate

Discretionary Revisions (which the author can choose to ignore)
None that this reviewer can find

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
