Reviewer's report

Title: Shoulder posture and median nerve sliding.

Version: 1 Date: 14 May 2004

Reviewer: Donal McNally

Reviewer's report:

General

This is a very well written paper, that contains material of scientific interest and clinical relevance. The study has well defined and sensible aims and follows an appropriate and well validated methodology. The results are interesting and conclusions drawn from these results are appropriate.

---------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

---------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision
