Reviewer's report

Title: Osteoporosis-related life habits and knowledge about osteoporosis among women in El Salvador: A cross-sectional study

Version: 1 Date: 20 April 2004

Reviewer: Richard Derman

Reviewer's report:

I have reviewed, edited and made comments regarding the attached article.

The greatest deficiency was the author's inability to write grammatically proper English.

The content was sufficiently interesting and expands the literature in Central America where few articles in osteoporosis have emerged. In that regard, pending re-do and response to queries, I believe the article is publishable.

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes
