Reviewer's report

Title: Myasthenia gravis in pregnancy. Course of 18 cases and their products.

Version: Date: 16 June 2004

Reviewer: josip djelmis

Reviewer's report:

The paper "Myasthenia gravis in pregnancy. Course of 18 cases and their products" is retrospective analysis of 18 patients with myasthenia gravis during pregnancy, labor and delivery and postpartum period. It is also analyzed the neonatal period of the 18 infants born of the MG mothers. The type of delivery was vaginal eight (44%), cesarean section eight (44%), one abortion (6%) and one (6%) vacuum extraction. If one pregnancy finished with abortion how is it possible that the authors analyzed 18 newborns.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached).

The authors have to explain the numbers of newborns.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published
