Reviewer's report

Title: Analyses of the differentiation potential of satellite cells from mdx and PMP22 C22 mice

Version: 1 Date: 10 February 2005

Reviewer: Gillian Butler-Browne

Reviewer's report:

General
This is a very descriptive paper for which there is no real criticism apart from the fact that they did not site the myoD KO cells in the title and they do not site other references on the interindividual differences found in mdx mice - for example a recent paper by Sheaffer et al which appeared in NMD.
