Reviewer's report

Title: Pre-competition habits and injuries in Taekwondo athletes.

Version: 3 Date: 5 April 2005

Reviewer: Andy M Lane

Reviewer's report:

I have read the revised work and the authors comments. I feel that they have addressed my concerns adequately. The paper is interesting as it documents some relevant issues in the sport of Tae Kwon Do. The authors achieve their aim and the work is a little descriptive.

I would suggest that before the work is published that it is given a good editing to improve the English in places. There are examples of single sentence paragraphs in places and some awkward sentences.
