Reviewer's report

Title: Immunologic Testing of Xeno-Derived Osteochondral Grafts Using Peripheral Blood Mononuclear Cells from Healthy Human Donors

Version: 2 Date: 25 May 2005

Reviewer: Henry Mankin

Reviewer's report:

General
I think the article is well written and the authors have revised it appropriately to answer all the questions that I wrote in the review. Thank them and you!

------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
