Reviewer's report

Title: Comparison of plasma endothelin levels between osteoporotic, osteopenic and normal subjects: a research article.

Version: 5 Date: 15 July 2005

Reviewer: Peter Vestergaard

Reviewer's report:

General

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

The authors have responded sufficiently to the points raised. However, in the paper it must be detailed which laboratory that performed the new analyses, and that the results were comparable to the first results.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No
