Reviewer’s report

Title: Effect of Urbanization on Bone Mineral Density: A Thai Epidemiological Study

Version: 2 Date: 9 December 2004

Reviewer: thierry Chevalley

Reviewer’s report:

General

--------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

The authors answered to all specific comments raised by the reviewer.
I would nevertheless suggest to add at the bottom of table 2 or in the results section a sentence such as:
“Since height was not a significant factor in the analysis of covariance, it was removed from the final ANCOVA model with no significant change of the results”

--------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

--------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
