Reviewer's report

Title: Knee movement patterns of injured and uninjured adolescent basketball players when landing from a jump: A case-control study

Version: 2 Date: 25 October 2005

Reviewer: Lyle Micheli

Reviewer's report:

General

---------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Reviewers Report

Page 11 P 2 line 12 – should read “Analyses were”

Page 15 section 4 last line – This would better read as corrected: The average negative work demonstrated by the injured players was -2.14J/N.m compared to -3.37J/N.m for the uninjured players.

Page 18 line 8 – should read “Thus, it is crucial for coaches and health professionals to ‘be’ able to identify players…..”

Page 20 line 20 – should read “Lose” not loose

---------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No
