Reviewer's report

Title: Reliability of two goniometric methods of measuring active inversion and eversion range of motion at the ankle

Version: 3 Date: 16 July 2006

Reviewer: Joost Dekker

Reviewer's report:

General

The authors have responded satisfactorily to my comments.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
