Reviewer's report

Title: No association between the aluminium content of trabecular bone and bone density, mass or size of the proximal femur in elderly men and women

Version: 3 Date: 17 June 2006
Reviewer: Magnus K Karlsson

Reviewer's report:

General
The authors have explained their rational for diving the data in two papers. It is of value that they focus on the DXA data that is not presented before.
No more questions.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
