Reviewer's report

**Title:** Incidence and prevalence of upper-extremity musculoskeletal disorders. A systematic appraisal of the literature.

**Version:** 2  **Date:** 3 December 2005

**Reviewer:** jesse jupiter

**Reviewer's report:**

---

General

---------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached) This reviewer would suggest the title be amended to give to the reader a clearer picture that you were not able to give incidence and really not prevalence data.

---------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

---------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

---------------------------------------------------------------------------------

---

**What next?:** Accept without revision

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No

**Declaration of competing interests:**
