Reviewer's report

Title: A musculoskeletal model of low grade connective tissue inflammation in patients with thyroid associated ophthalmopathy (TAO). The WOMED concept of lateral tension and its general implications in disease.

Version: 2 Date: 11 January 2007

Reviewer: Karen Grimmer

Reviewer's report:

General

-------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

-------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
This paper appears to have been well revised, with attention to as much detail as possible. A more comprehensive rebuttal document would have been appreciated to assist reviewering of changes.

-------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
