Reviewer’s report

Title: The effects of the Mulligan Sustained Natural Apophyseal Glide (SNAG) mobilisation in the lumbar flexion range of asymptomatic subjects as measured by the Zebris CMS20 3-D motion analysis system.

Version: 8 Date: 5 August 2008

Reviewer: Toby Hall

Reviewer’s report:

The authors have made considerable efforts to improve the paper. I think it is acceptable for publication with some minor corrections.

Page 12 1st paragraph. Final sentence needs re-wording. Meaning is unclear

Use of comma rather than . is not recommended to signify decimal point. Makes the tables confusing

Table 2 measurement units need defining.
Table 4 measurement unit for age needs defining

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
