Title: The Orthopaedic Trauma Literature: An Evaluation of Statistically Significant Findings in Orthopaedic Trauma Randomized Trials

Version: 1 Date: 27 October 2007

Reviewer: Sari Ponzer

Reviewer’s report:

General

This paper addresses a very important issue. It is well written and easy to follow. It has highly relevant key messages for the orthopaedic society. The statistics used (in spite of the complexity of the analysis) are explained in a way that makes it easy to understand even for those not daily dealing with research questions. I really enjoyed reading this paper.

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
