Title: The relative timing of VMO and VL in the aetiology of anterior knee pain: a systematic review and meta-analysis.

Version: 2 Date: 31 October 2007

Reviewer: lee herrington

Reviewer's report:

General
The authors have responded very well to the comments made on the previous review, I would be more than happy now to recommend the is paper for acceptance

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
