Reviewer's report

Title: A systematic review with procedural assessments and meta-analysis of Low Level Laser Therapy in lateral elbow tendinopathy (tennis elbow)

Version: 1 Date: 25 February 2008

Reviewer: Jan D. Rompe

Reviewer's report:

This is an excellent piece of work.
1) Abstract is missing !!!!!!!!!!!!!!!!!!!!!
2) Methods well described
3) Text too long, too many figures
4) Very good to subgroup LTTT according to applied wavelengths and mW output, as there was heterogeneity in treatment procedures and LLLT doses

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
