Reviewer’s report

Title: Cystic colon duplication causing intussusception in a 25-year-old man: report of a case and review of the literature

Version: 2 Date: 19 November 2009

Reviewer: Dieter Hahnloser

Reviewer’s report:

- The background section is too long, too narrative.
- Please provide pathological evidence (histopathology) that this was indeed a duplication and not just a simple cyst.
- The review of the literature is only one article! Many information in the background section should be in the discussion section.
- Try to discuss the indication for operation. It is unclear to me what I should learn from this case. What would you do different the next time? and why?

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
