Reviewer’s report

Title: Long term outcome and quality of life after open incisional hernia repair - light versus heavy weight meshes

Version: 2 Date: 15 July 2011

Reviewer: Jochen Grommes

Reviewer’s report:

In my opinion this study cannot effort new aspects in hernia surgery due to the very small patients number. If you would be able to include more patients, the study would be interesting.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
