Reviewer’s report

**Title:** Severe inflammatory reaction induced by peritoneal trauma is the key driving mechanism of postoperative adhesion formation

**Version:** 4  **Date:** 26 August 2011

**Reviewer:** Maria Mercedes Binda

**Reviewer’s report:**

Some questions from my first report were not replied yet.
3)a) "double" still in the text of experimental design.
3)b) 6 month old should be included in the text
3)(d) who did what should be included in the text of surgical protocol and evaluation of adhesions, please
5)(c) I haven't got a response. Did you check that?
5)(e) it is not added to the text.
6)a) I haven't got a replying.
6) b) thanks for the replying but please add it to the text. These questions are the interest for the future readers.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
