Reviewer's report

Title: Acute mesenteric ischaemia and duodenal ulcer perforation: A unique double pathology

Version: 2 Date: 31 August 2012

Reviewer: Usama Ahmed Ali

Reviewer's report:

Major Compulsory Revisions:
1. In my opinion, the authors fail to use this case to relate it to other similar/related reports in literature, and thereby make it truly educational for the reader, despite being provided with references for that use. This limits the interest and value of this article. Therefore, I can not be sure that publication is of interest to the field.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
