Title: Abdominal cerebrospinal fluid pseudocyst occurring 21 years after ventriculoperitoneal shunt placement: a case study

Version: 1 Date: 13 April 2013

Reviewer: farideh Nejat

Reviewer's report:

Acceptable as is now

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

It is a well written case report regarding a very rare complication of shunt. The introduction and discussion have been written very well, the case report was confirmative of an organized approach to this rare complication after many years of shunt procedure. I advice the paper to be published. It has good instructive points for the readers.
