Reviewer's report

Title: A multiplanar complex resection of a low-grade chondrosarcoma of the distal femur guided by K-wires previously inserted under CT-guide: a case report

Version: 3  Date: 12 March 2014

Reviewer: Ralf Henkelmann

Reviewer's report:

The authors shows an interesting technique of a chondrosarcoma resection. The case and the operative intervention is pictured well. There is no ethical objection in my opinion.

1. Major Compulsory Revision:

As presented by the author biopsy grading might undergraduate chondrosarcoma. Therefore a concluding pathological evaluation of the tumor after resection and a histological description of the tumor margin is missing.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
