Reviewer's report

**Title:** Rhizotomy targeting the intermediate nerve, the glossopharyngeal nerve and the upper 1st to 2nd rootlets of the vagus nerve for the treatment of laryngeal neuralgia combined with intermediate nerve neuralgia-a case report

**Version:** 4  **Date:** 2 April 2014

**Reviewer:** Martin Mortazavi

**Reviewer's report:**

The English language is still not good.
It is not clear how the authors' thought and diagnostic process went when they differentiated between glossopharyngeal and intermediate neuralgia.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
