Reviewer's report

Title: Diffuse large B-cell lymphoma of the colon with synchronous liver metastasis: a rare case report mimicking metastatic colorectal adenocarcinoma.

Version: 1 Date: 8 July 2014

Reviewer: MARTA PASCUAL

Reviewer's report:

Minor Essential Revisions:

BACKGROUND:
The findings of the CT scan are not only the mass of the ascending colon but also the liver met, the authors have to give more information about the metastasis and its location, this is important too to know what kind of liver resection was performed.

CASE PRESENTATION:
The expression "ab extrinseco" must be put on italics and quotation marks also on the figure 1.

the authors may specify more in detail what kind of deterioration the patient suffered that prompted they to perform emergent surgery.

Once again its important to know what kind of liver resection were performed simultaneously to colon resection.

The last paragraph of this section is not understood very well, I think there is a syntax error, please check.

DISCUSSION:
Missing some references in the text and others are not numbered correctly, next to the names should be the corresponding numbers.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
