Title: A large left ventricular pseudoaneurysm in a case of Behcet’s disease and literature review

Version: 1 Date: 6 February 2005

Reviewer: Masamichi Ono

Reviewers report:

General
It is thought to be a rare case, which is worth for publication.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
Discussion (authors wrote as conclusions) must be re-written. It must be shortened, and must be commented as diagnosis, therapy, and prognosis. The need for cardiopulmonary bypass for tumor resection should be discussed.

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
Figures 1-4 are too much. I think figure 1 and 2 can be deleted. Macro figure of the pseudoaneurysm should be added.

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No
