Reviewer’s report

Title: Epiploic Appendagitis - Clinical Characteristics of an Uncommon Surgical Diagnosis

Version: 1 Date: 16 April 2007

Reviewer: Bernard Boulanger

Reviewer’s report:

General

--------------------------------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached) None

--------------------------------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct) None

--------------------------------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

The authors may wish to further acknowledge that non-operative therapy of EA is widely applied with success.

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
